

Hashbon

HASHBON ICO

-

Multi-blockchain framework for building business applications

Hashbon framework - is a universal platform for effective building any applications or smart contracts, that work on top of live public blockchains: Bitcoin, Litecoin, Dash, Zcash, Monero and others. Framework will allow to store information on several blockchains simultaneously for better reliability in automatic and intellectual way, including the choice of blockchain that currently offers better fee for storing KB of data.

As well, it will support all major APIs, like Blockcypher, Blocktrail, Blockchain.info etc with unified interface. So you can double-check information from different sources, for better reliability. Because using only one API creates centralization, which implies high risk for business.

After creating the multi-blockchain framework - we want to use it to implement business applications. We can build a lot of blockchain apps, that will be used for business. One important example is creating digital ecosystem for relationship between shareholders and management of public companies (IRM). **Developing framework together with real business application, will make framework more demandable and useful.**

HASHBON - BLOCKCHAIN FRAMEWORK

◆ Blockchain applications

◆ Different programming languages: PHP, Java and more

◆ Bitcoin, Litecoin, Dash blockchains

◆ Smart contract libraries

◆ Reliability, convenience, cost-effectiveness

◆ Blockcypher, Blocktrail, Matbea.net APIs

Cost of tokens and stages of sales

PRE SALE:

10 000 000 HASH, BONUS 40% , COST 1 HASH = 0,10€

START - AUGUST 1, 2018 / END - AUGUST 22, 2018

1ST STAGE:

20 000 000 HASH, BONUS 30%, COST 1 HASH = 0,10€

START - AUGUST 23, 2018 / END - SEPTEMBER 13, 2018

2ND STAGE:

30 000 000 HASH, BONUS 20%, COST 1 HASH = 0,10€

START - SEPTEMBER 13, 2018 / END - OCTOBER 5, 2018

3ST STAGE:

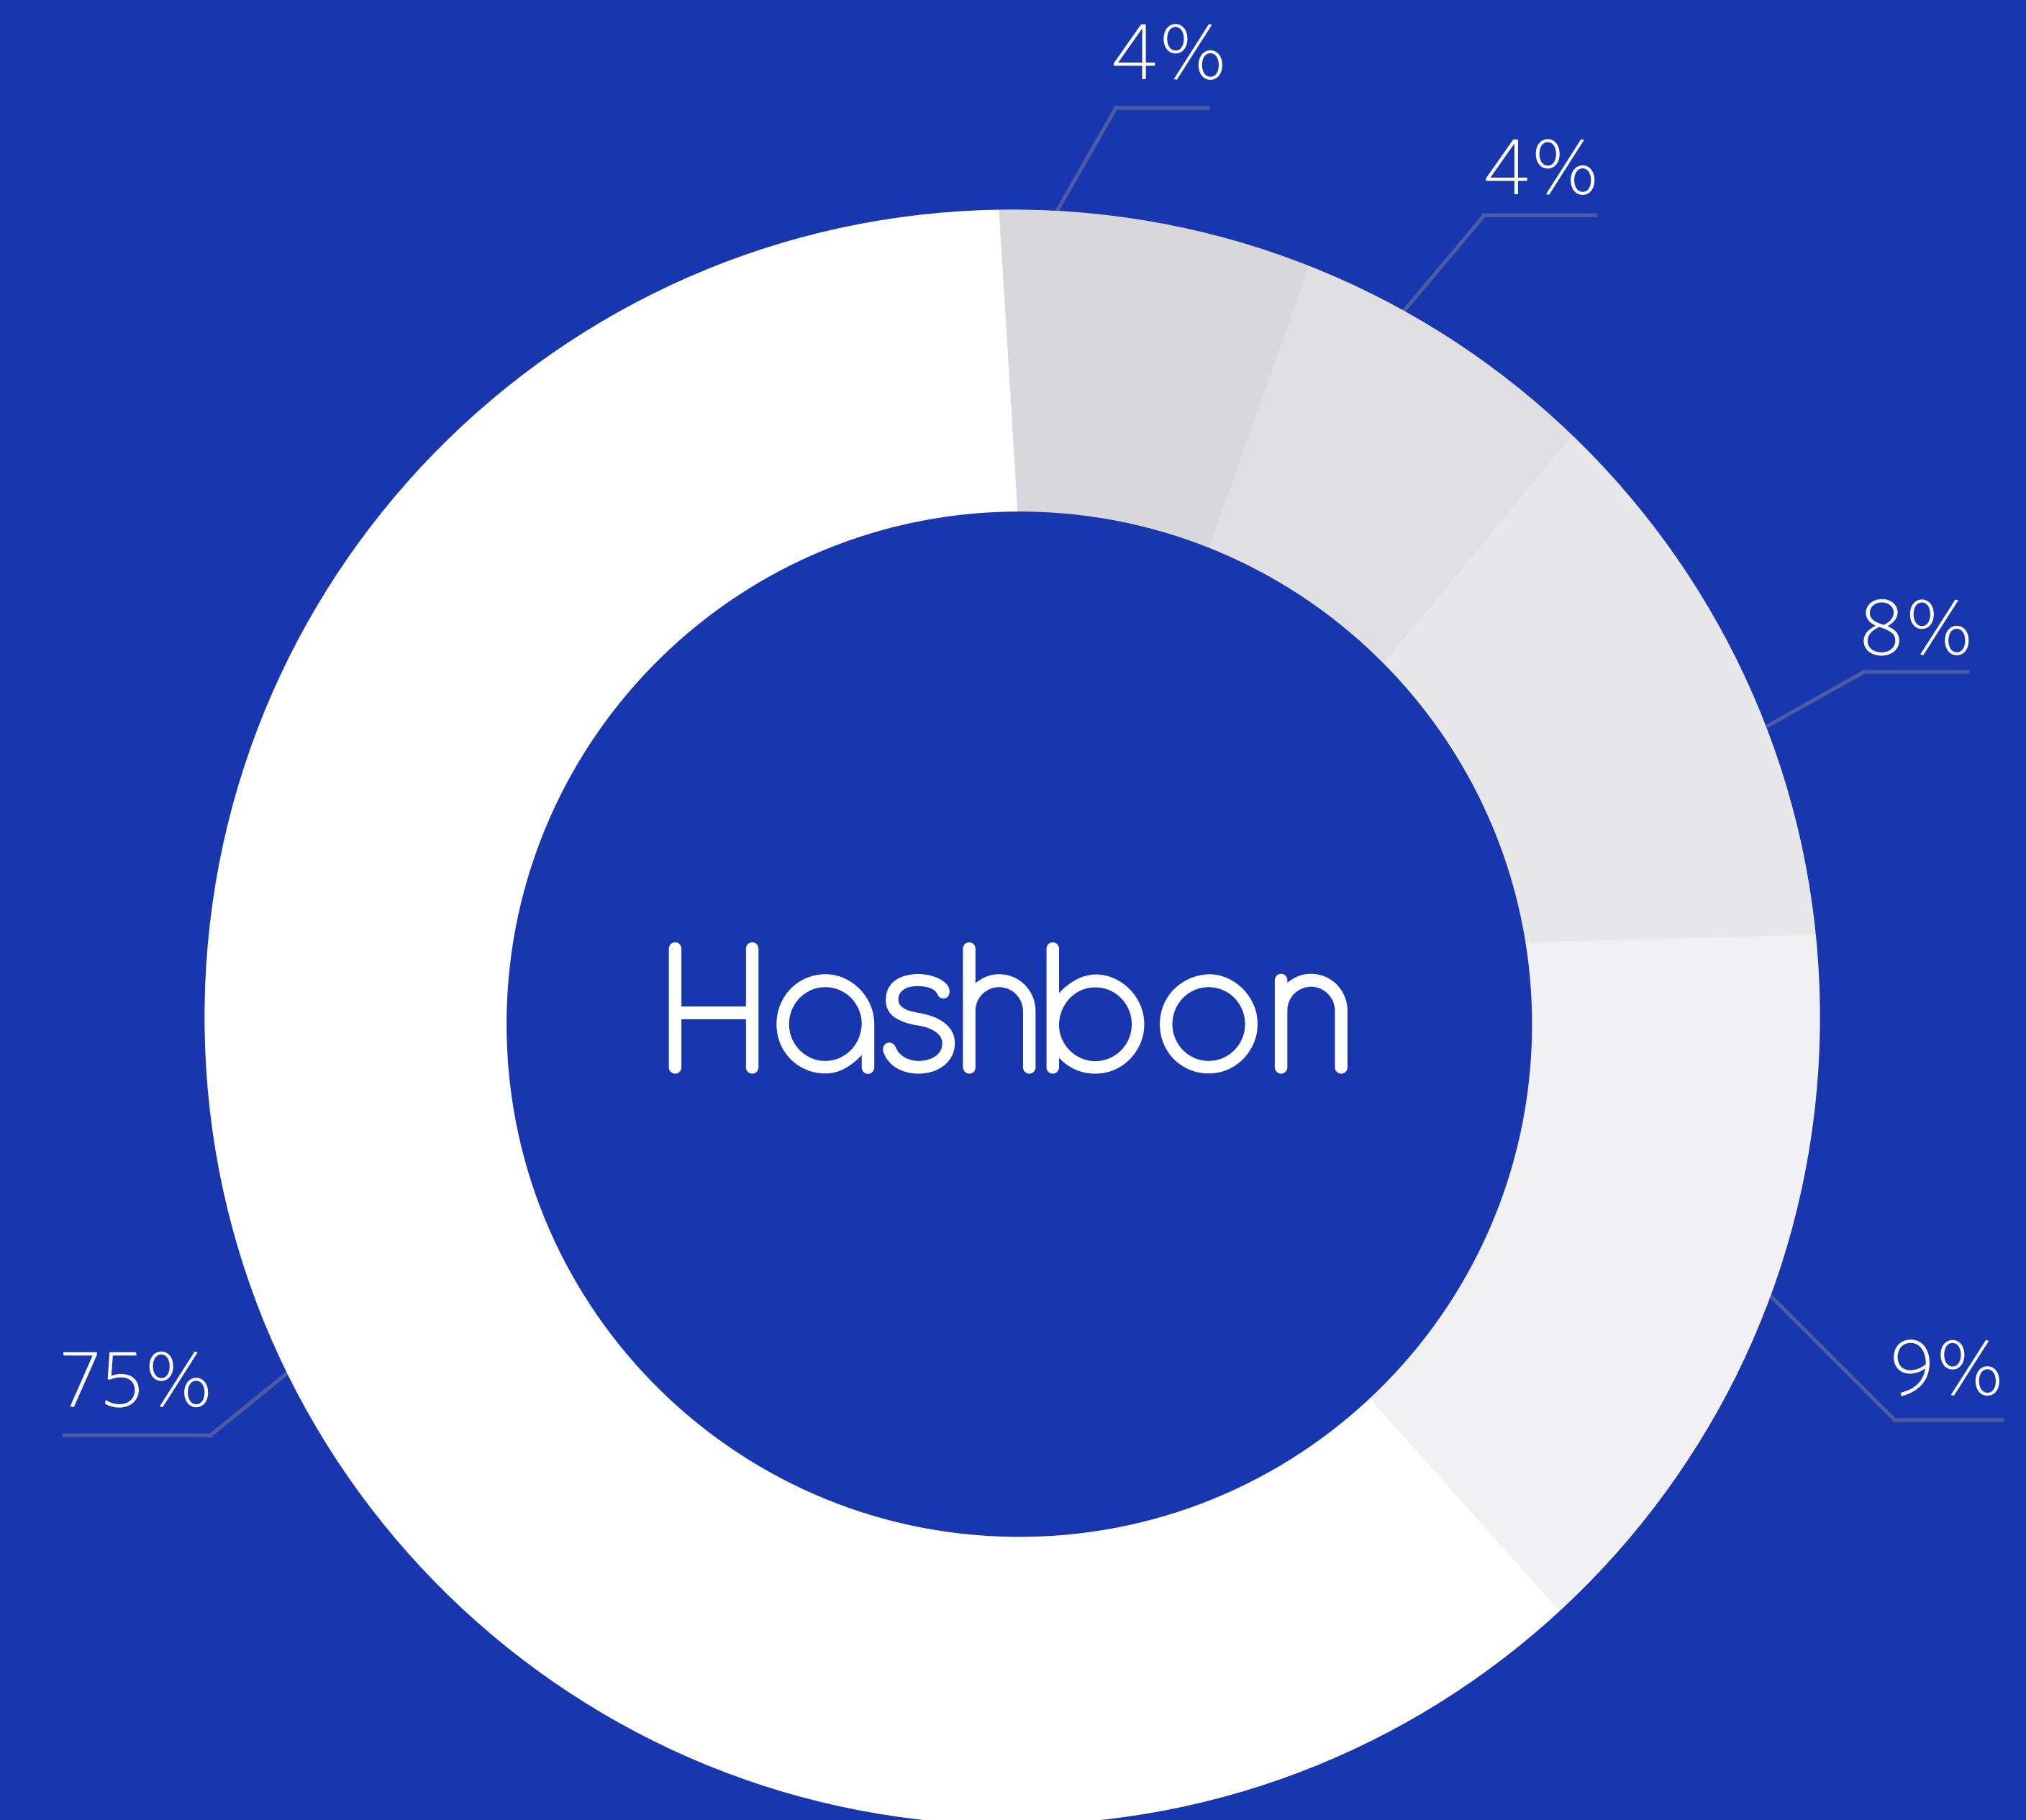

40 000 000 HASH, BONUS 10%, COST 1 HASH = 0,10€

START - OCTOBER 6, 2018 / END - NOVEMBER 3, 2018

Total number of tokens for ICO 200 000 000 HASH tokens.

Soft cap 1 000 000 €

Hard cap 10 000 000 €

The total emission of tokens will be distributed as follows:

75% public sale in four rounds

9% project team

8% loyalty program in the early stages

4% bounty

4% advisors

Completed projects

MATBEA

Popular cryptocurrency wallet in Russia, launched in 2014, 80 000+customers,

<https://matbea.com/>

MATBEA^{NET}

Blockchain API with unique features:
You can view relation between bitcoin exchange and bitcoin address free of charge.

<http://matbea.net/>

Bitmap

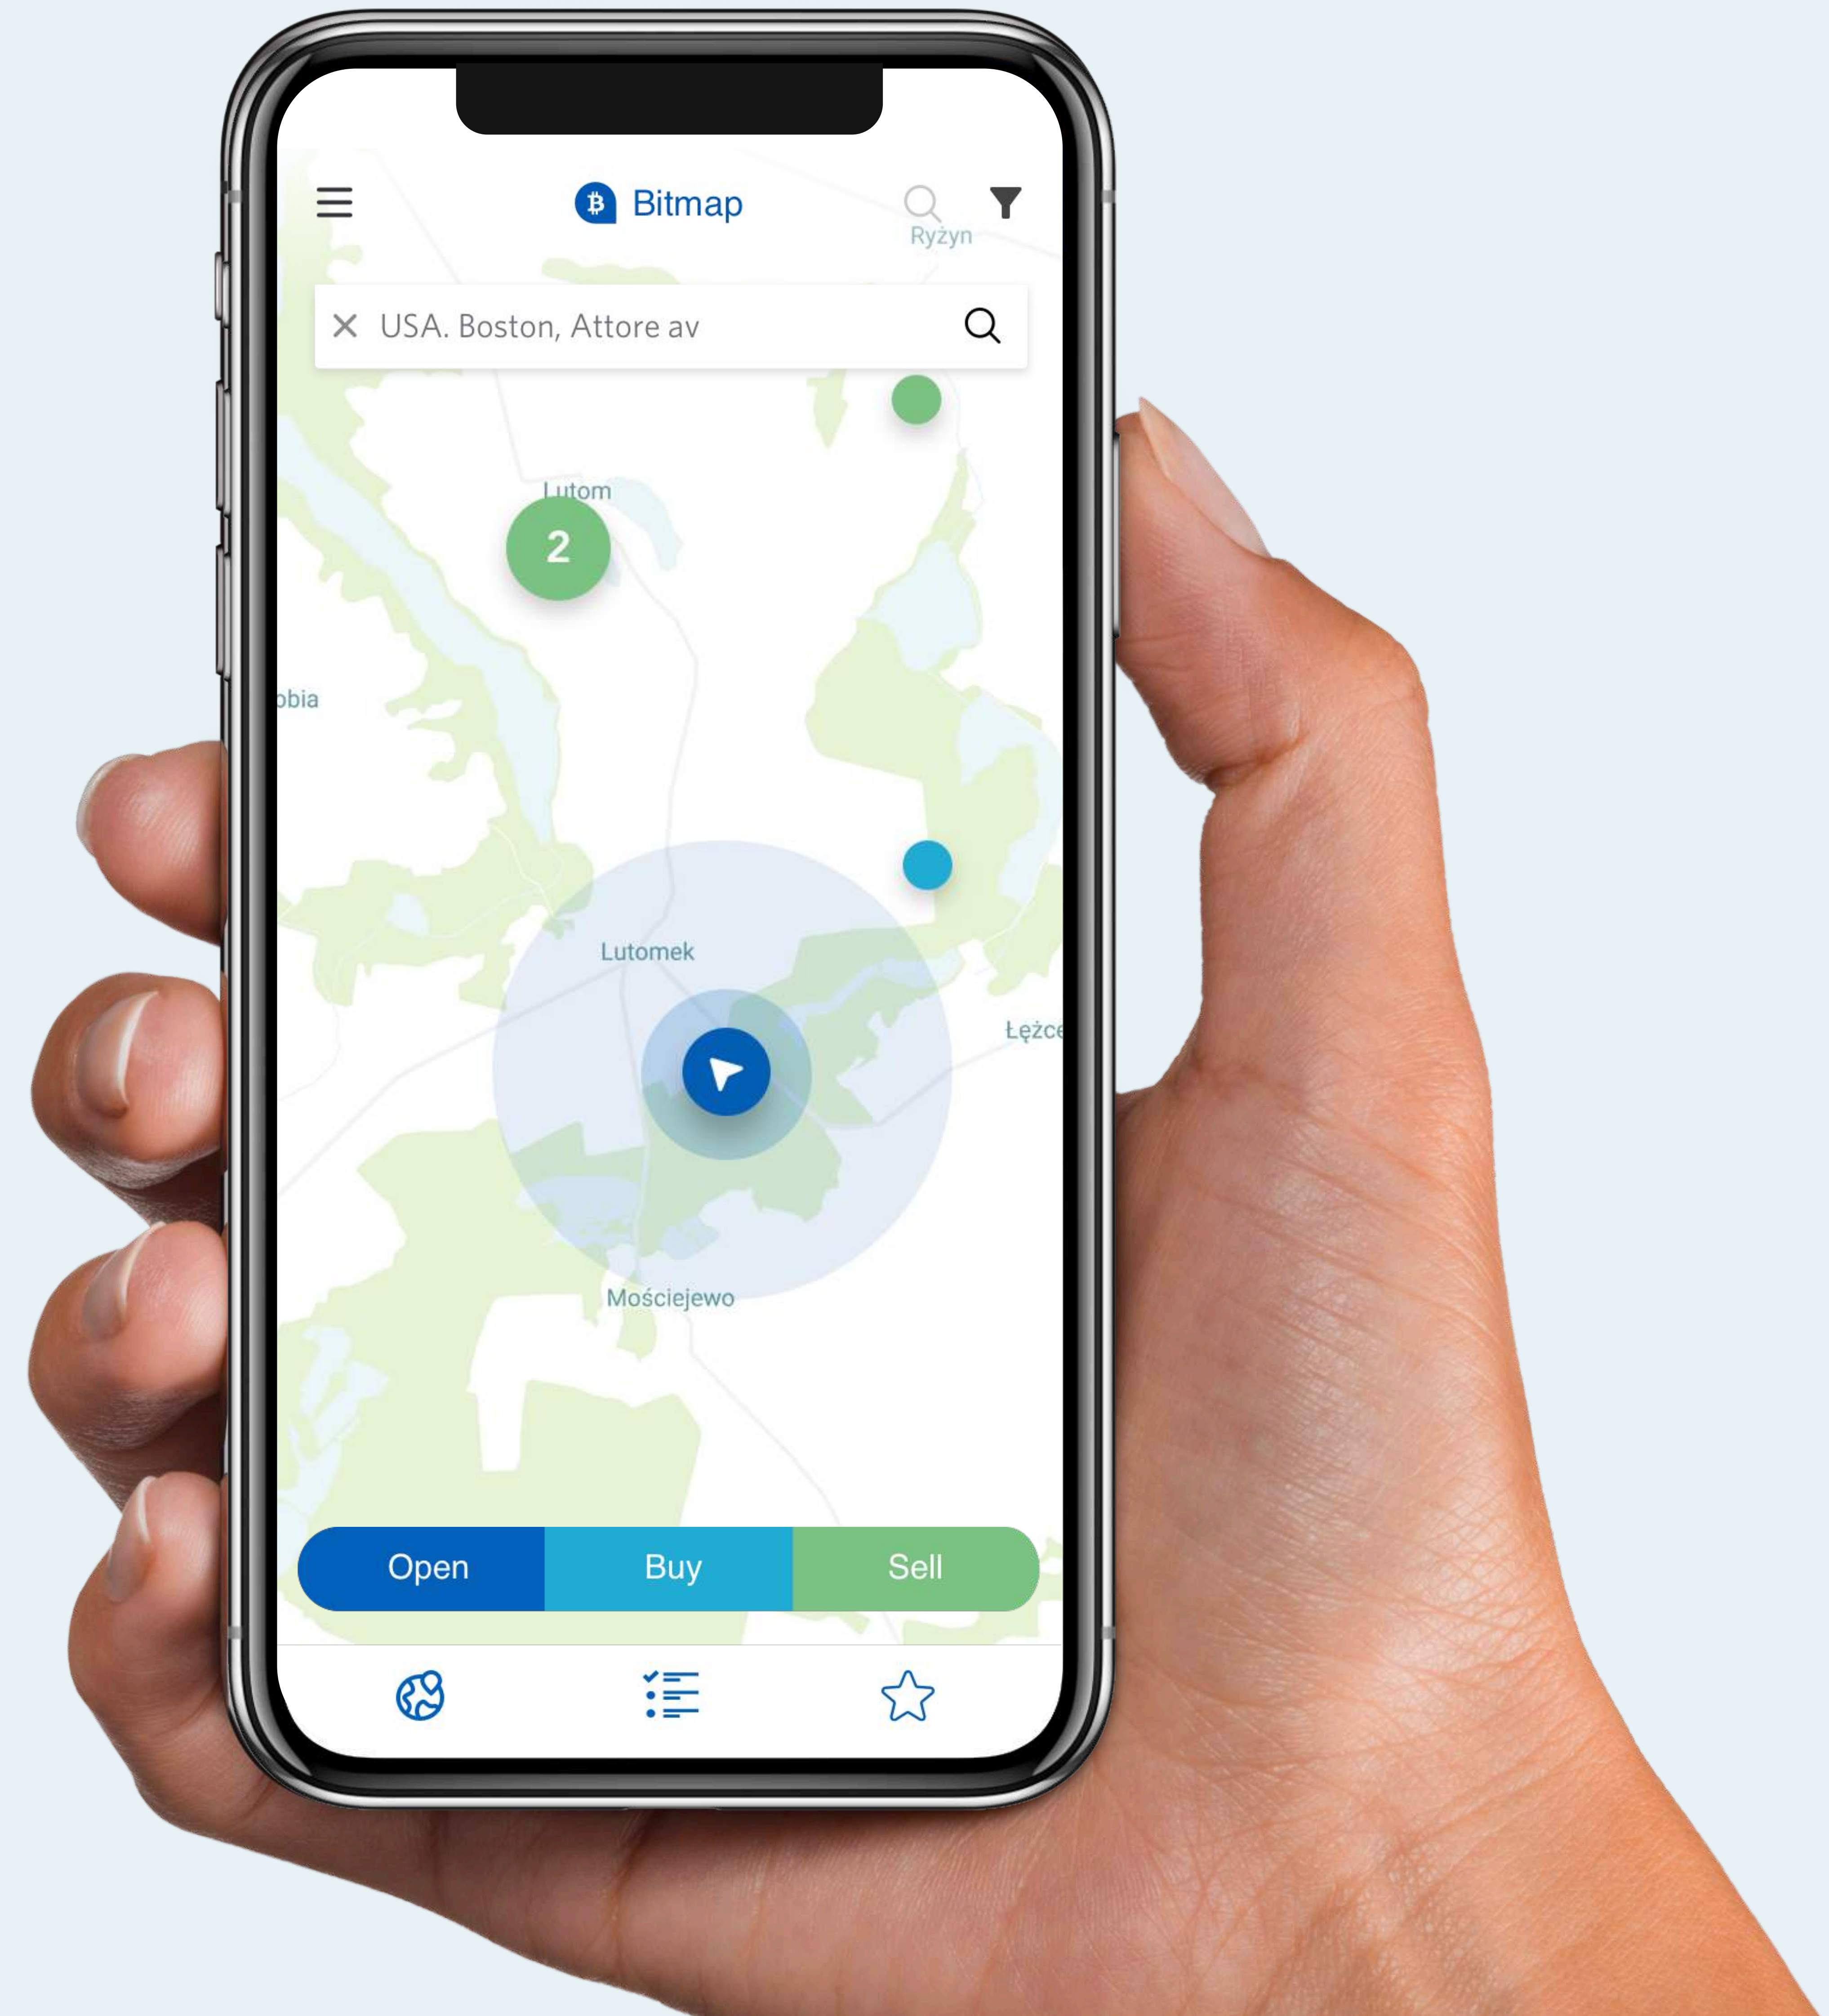

BitMap app iOS and Android app to locate bitcoin ATMs 10 000+ installs

<http://bitmapp.org/>

gefarapay

European cryptocurrency wallet available in web, ios and Android versions. Launched in 2016
